

THE ADVOCATE

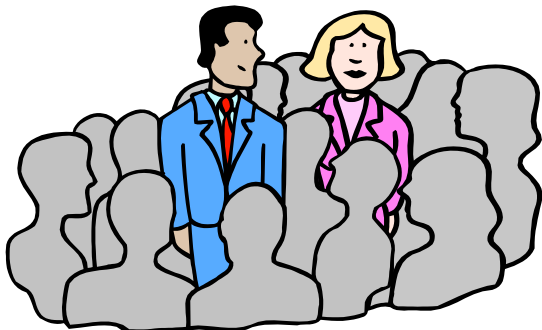

Promoting a Drug Free Work Place

June 2003, Vol. 2, Issue 6

Editor: Kristen Smith

Can you IDENTIFY the employees who may be using drugs/alcohol in YOUR workplace?

WE CAN!

- ❖ WOLFE DATA'S pre-employment drug testing program is a great way to ensure that your candidates are drug free before they begin their new jobs.
- ❖ What they do AFTER "landing the job" may surprise you.
- ❖ Many drug and alcohol users/abusers, assuming most businesses conduct pre-employment testing, can refrain from their "habits" or "recreational drug use" when searching for employment.
- ❖ Without the advantage of RANDOM DRUG TESTING included in your policy, drug users/abusers will often infiltrate your workplace.
- ❖ WOLFE DATA's RANDOM DRUG TESTING PROGRAM is the added measure you need to be sure that your workplace remains a drug and alcohol free environment.

To learn more about the "benefits" of Wolfe Data's Random Selection Program, call our toll free number:

NEW "DATE RAPE" PANEL FROM KEYSTONE LABORATORIES

Approximately 80% of all reported cases of rape in the United States are classified as "acquaintance rapes." A growing number of this percentage is propagated by the use of debilitating or incapacitating drugs. Victims

of this crime often experience anterograde amnesia. Because of this, victims are often unable to serve as the key witness during a trial. This makes forensic urine testing a key piece of evidence in drug facilitated sexual assault cases, and often serves as the only link between the sexual assailant and the victim.

Keystone Laboratories, Inc. recently developed a comprehensive "DATE RAPE" panel that is forensically valid, and completely confidential!

For more information, you may contact their newly acquired website... <http://www.daterapetesting.com>.

Mission Statement

"To remain the leader in the drug and alcohol testing industry throughout the United States by utilizing both the skills of a highly trained and motivated staff and the latest technological advances while providing innovative products, superior value, and impeccable service to our customers."
